Airship guide ffxiv reddit

We have access to the workshop and I noticed that we can build an airship. I'm not sure if we should build a dirigible, a submarine? I heard that this is a great way to make money in the game, however I am not sure as a solo project. Each advice would be appreciated. Everything I find it is like 2016 and the back. Our Fresh FC has just reached rank 6, and I am anxious to dig in the game of travel. I looked at some general guides, and there is an overabundance of detailed guides who probably would have made sense if I had been around when they were developed. Continue that spending hours of reading through long wires and large tables, I decided to enter in a little blind, take my muddy hands à € à € and then dig in the guides when I have a certain first hand experience. For any simple advice or warnings that could avoid making any errors errors or embarking on super inefficient approaches (if, indeed, there are.) From the top of my head, it is also worth starting aerial, or I should start going to SUMMABLE TERMABLE TRAVEL? Thanks for any intuition, some of you can offer me here! He recently built an FC and has a house and built a laboratory and was wondering if I had to go just for subtitles or airship or both? Basically giving them a shit freely to build and I have nothing in return. Before leaving I was helping with the only ones and airships. Thanks in advance for any information. Otherwise, has anyone made a copy of it in their unit of Google that they could offer? In any case, obtained with another FC who has a diver and a dirigible, for a long time story I was given access to them and they were balls on the wall in the last few days updating and playing with them. I hadn't finished reading it when it was canceled, but it was Why is there a more recent version somewhere? My friend and I have a small FC, about 5 people. Ok, so my fc has just purchased a house and we're trying to build airship and e But none of us really knows what we're doing, are there guides for brand new people at this kind of stuff? I recently left my old FC and I joined a better one. Currently I am the only one interested in putting it into work to do so. I tried to search for the airship and submersible things for my free company and was using the Pepper Division Guide. I set the ATM reaction airship, but I can't for the life of me to find any type of guide of delorship / sub leveling updated. Both? Both?
