

Sound Record & Play Module

Besides real-time noise analysis, VA-lab supports one channel and two-channel sound record. The record data can be used in post-process and playback using BSWA excellent performance hardware. The latter is important in Subjective measurement.

Main Features

- One-Channel or Two channel record
- Two file format record: Txt, Wave
- Time-field detection
- Narrowband frequency analysis base on FFT
- Filter setting

Most Common Solution

- MC3622 (two-channel DA)
- BHead 200 Dummy Head
- Sennheiser HD650 earphone
- VA-Lab R&P
